The physical performance test will consist of four (4) components as described in the enclosed sheet. Different passing standards have been established to account for the age and gender of each candidate. Each candidate is responsible to know his/her target for each event. Candidates should wear gym-type clothing and appropriate footwear. Please do not bring a walkman or other device that will not allow you to hear monitors' instructions. Unless otherwise notified, the test will be held despite inclement weather. The descriptive materials regarding the physical performance test should be reviewed carefully by all candidates. **All candidates should note that the standards for each event have been set at the 40th percentile of fitness.**

Enclosed please find a Doctor's Certification Form. All candidates **must have a licensed medical doctor complete the MEDICAL APPROVAL FORM FOR BASIC TRAINING, LATERAL TRANSFERS AND/OR COMPARATIVE CERTIFICATION Form** before they will be allowed to compete in the physical performance test. **This form must be brought to the physical performance examination site on the test date and should not be returned with the application.** In addition, use the original form from this application package for this test administration. Further instructions regarding the physical performance test will be given prior to the start of the test. **Candidates are required to be at the test site promptly for registration. The administration of the test will follow immediately after registration is completed. Admittance will not be allowed once the test begins.** Please also be advised that you must pass all components of the physical performance test to go on to the next test phase. HOW WILL PHYSICAL FITNESS BE MEASURED?

The physical fitness test battery consists of four basic tests. Each test is a scientifically valid test.

The tests given are described as follows.

1. One (1) Minute Sit-Up Test

This is a measure of the muscular endurance of the abdominal muscles. It is an important area for performing police tasks that may involve the use of force. The score is in the number of bent leg sit-ups performed in one minute.

2. Anaerobic Power (Sprinting Ability) 300 Meter Run Test

This test is a measure of anaerobic power. Anaerobic power is having the ability to make short intense bursts of effort. This test is highly predictive of the important area for performing job tasks such as short sprint pursuit situations. This is a timed run, recorded in seconds, at maximal level of effort.

3. Push up test

This test measures muscular endurance of the upper body. The hands are placed slightly wider than Shoulder width apart, with fingers pointed forward. The candidate's head will be looking straight forward. The test starts from the Up position (elbows fully extended) and must keep their back straight and flat at all times. The candidate will lower their body to the floor until their chest touches the administrator's fist (or acceptable measuring tool) at a depth of no less than 4 inches from the floor. The candidate then returns to the Up position. This is ONE repetition. Resting should be done in the Up position. The total number of correct push-ups performed in One (1) minute is recorded as the score. The candidate's knees will not touch the floor. The "modified" push-up will NOT be used.

4. 1.5 Mile Run

This is a timed run to measure the heart and vascular systems capability to transport oxygen. It is an important area for performing police tasks involving stamina and endurance. The score is in minutes and seconds.
